

CAKE CARE

In order to maintain the look and flavour of the cake, it's important to transport and store it in suitable conditions.

When transporting your cake:

- o Hold the box by the base **ONLY**, carrying the cake by the sides of the box may damage the cake.
- o Place your cake on a flat surface such as the footwell or boot of your car.
- o Turn off the heating in your car to ensure the buttercream doesn't melt. (You may have to switch on the air-con on warmer days)
- o Please drive carefully; **I no longer hold any responsibility for the cake when it leaves my premises.**

Storing your cake:

- o You **MUST** store your cake in the fridge up until it is needed, making sure to remove any cake toppers beforehand. It is a good idea to make room for your cake before collecting it.
